# Esteve Autet Alexe

Web Developer

My name is Esteve, and since the age of 12 I have been learning and programming on my own. Throughout these years I have developed personal and academic projects that have allowed me to acquire experience with React, PHP and databases such as PostgreSQL and MySQL.

Currently, I am looking for a job opportunity that will allow me to continue learning and finance my studies, while contributing in a real way to development projects. I have a special passion for the Rust language, which I practice in my free time, and I'm also deeply interested in system programming and the internal workings of low-level software.

I am an autonomous person, curious and oriented to solving problems, used to research and learn on my own initiative. Furthermore, I think he could bring energy and adaptability to the team, especially in environments where constant learning and technical efficiency are valued.

I would greatly appreciate the opportunity to speak with you to discuss how I could fit into your team.

Sincerely,  
**Esteve Autet Alexe**
